

IMMUNIZEN

Support a Healthy Immune System*

To meet life's daily demands, the immune system needs to be at its best. The immune system is the body's defender—it helps recognize and neutralize threatening intruders. Without a healthy immune system, the body is vulnerable to outside invaders, which can disrupt your life.

Immunizen contains a proprietary blend of ingredients that supports the body's natural immune functions.* Immunizen features bovine colostrum, which provides key immunoglobulins, protein compounds, and enzymes that support the body's immune system. Immunizen promotes friendly intestinal bacteria, and it also provides the body with beneficial antioxidants. This unique formula further supports the immune system with yeast beta-glucans, arabinogalactan, and lactoferrin. With its premium blend of ingredients, Immunizen will provide fuel to support the body's ultimate defender: the immune system.

Give the body's defender (the immune system) the support it needs with Immunizen.

FEATURES

- Unicity's premiere immune support product
- Proprietary blend of immune-supporting ingredients
- Formulated for daily and year-round immune support

BENEFITS

Promotes a normal, healthy immune response*

Promotes the growth and activity of beneficial bacteria*

Supports overall health and well-being*

Supports the innate, passive, and adaptive immune responses*

PERFECT FOR

Adults who want to support their immune health

Individuals who want to support the body's natural immune defense system

INGREDIENTS

Bovine Colostrum – Colostrum is the first food mammals give their newborn offspring. Bovine colostrum contains key immunoglobulins, protein compounds, and enzymes that support immune cells.

Yeast Beta-Glucans – Beta-glucans are a group of complex carbohydrates (fibers) called polysaccharides, and they are found in the cell walls of certain foods. We use a proprietary blend derived from baker's yeast to produce immune-modulating effects, which help support normal immune cell functions.

Lactoferrin – Lactoferrin is a protein that supports immunity. Lactoferrin is found in many body fluids, such as saliva and tears. Lactoferrin is the first trigger in the body that engages the immune cells.

Arabinogalactan – Arabinogalactan is a natural fiber that ferments in the gut and promotes good intestinal bacteria that support the immune system.

USAGE

Take 2 capsules once daily with water.

For additional support, take up to 6 capsules daily for ten days as needed.

SCIENCE BEHIND

Immunizen has been developed to promote the body's passive, innate, and adaptive immune functions.

Passive – Passive immunity results from the introduction of immune-supporting compounds from one person or animal to another. In Immunizen, bovine colostrum and lactoferrin deliver these passive immune supporting compounds.

Innate – Innate immunity is the body's first line of defense; it is the naturally present immune response in the body. Examples of innate immunity include the cough reflex, enzymes in tears and skin oils, and mucus. The lactoferrin in Immunizen also supports innate immune functions.

Adaptive – Adaptive immunity is the body's second line of defense. The adaptive immune function is an immune subsystem composed of specialized systemic cells and processes that combats bad bacteria. The beta-glucans and arabinogalactan work with the adaptive immune functions of the gut microbiome.

SUPPLEMENT FACTS

30 servings per container

Serving size

2 capsules

Amount per serving

% Daily Value*

Proprietary Blend

1.35 g

†

Colostrum (standardized to 15% IgG, Bovine)

Arabinogalactan

Beta 1, 3/1, 6 Glucan (Yeast Cell Wall Extract)

Lactoferrin (from milk protein)

† Daily Value not established.

Other Ingredients: Gelatin, Stearic Acid, Silicon Dioxide. Contains: Milk.

FAQ

Who can take Immunizen?

Immunizen is designed for adults. Since Immunizen contains lactose, it is not recommended for those who are lactose intolerant. Pregnant or nursing women should consult their doctor before use.

How does this nutritional supplement support the immune system?

The nutrients in Immunizen promote a normal immune system response. Immunizen contains antioxidants, which promote health and well-being. Additionally, the product supports immune functions through the gut microbiome. Immunizen is a multifunctional immune support product with ingredients not readily found in the typical modern diet.

What is bovine colostrum?

Bovine colostrum is derived from the pre-milk liquid of the cow's mammary gland; bovine colostrum is extracted during the first 24 to 48 hours after the cow gives birth. This substance contains key immunoglobulins, protein compounds, and enzymes. These compounds in bovine colostrum are beneficial to the immune system.

Immunizen contains beta-glucans, which come from baker's yeast. Can a person who is sensitive to yeast consume this product?

The beta-glucans in Immunizen are isolated from the cell walls of yeast. The finished product does not contain any yeast components or byproducts, so it should present no problem for those who are sensitive to yeast. But, as with introducing any new supplement, we recommend starting slow and discontinuing use if there are any concerns.
