

Unimate Lemon vs. Unimate Natural Lemon: What's changing in the new formula

Here at Unicity, we are dedicated to a spirit of innovation and continuous improvements. For this reason, we have made some adjustments to our Unimate Lemon formula to better serve you. These positive changes have not had any effect on the efficacy of the product, so you can still expect the same amazing benefits.

- Contains no artificial flavors or sweeteners
- 1 g carbohydrates
- 35 mg sodium
- 5 calories

UNICITY Unimate Natural Lemon FAQs

How do the formula changes in Unimate Natural Lemon affect the taste, texture, color, etc.?

Unimate Natural Lemon has a slightly smoother texture than Unimate Lemon, and is somewhat lighter in color. You may also taste more of the natural Unimate flavor. Stevia is less sweet than sucralose, allowing more of the natural Unimate flavor to come through. Overall, the Unimate Natural Lemon flavor is a little less sweet and more citrusy than Unimate Lemon. These subtle changes improve the Unimate experience without straying from what you already love about Unimate Lemon.

Can I still drink Unimate Natural Lemon when I'm fasting?

Yes! Unimate Natural Lemon has fewer carbohydrates and calories than Unimate Lemon and is still an excellent option to help you extend your fast.

Have the benefits changed?

No. Unimate Natural Lemon has the same amazing benefits you'll find in all of our Unimate flavors.
